

At Work in California

NMDPSM is a leader in cell therapy, helping to find cures and save lives for patients with blood cancers, disorders and beyond. We're expanding access so that every patient can receive their life-saving cell therapy. Here's what our work looks like in your state:

2023 State Impact

8,368 searching patients

from 2019-23

3,077 transplants

from 2019-23

1,847 donors

answered the call from 2019-23

1,110,201 residents

willing to donate

Your support helps push the boundaries of what's possible.

From the moment a patient is diagnosed, we're there every step of the way. We create more opportunities for better outcomes. One way we do this is by providing patient assistance grants to help families cover out-of-pocket expenses related to transplant.

Since these grants became available, **1,020 patients in California** have received financial assistance totaling **\$2,369,986 to help more patients** go through the transplant process. Of these patients, **18% were children.**

NMDP Network Partners in California

APHERESIS CENTERS

- LifeStream
- Alta Bates Summit Medical Center
- Stanford Health Care
- UCSF Medical Center
- City of Hope National Medical Center
- Scripps Green Hospital

COLLECTION CENTERS

- UCSF Medical Center
- Stanford Health Care
- City of Hope National Medical Center
- Alta Bates Summit Medical Center
- Scripps Green Hospital
- Sutter Medical Center, Sacramento

TRANSPLANT CENTERS

- Rady Childrens Hospital-San Diego
- Loma Linda University Medical Center
- Sutter Medical Center, Sacramento
- USC Bone Marrow Transplant Program
- Lucile Packard Children's Hospital
- UC San Diego Medical Center
- UC Davis Medical Center
- Cedars-Sinai Medical Center
- UCSF Benioff Children's Hospital - Oakland
- Scripps Green Hospital
- University of California, Davis Medical Center
- Children's Hospital Los Angeles
- UCSF Medical Center
- City of Hope National Medical Center
- Stanford Health Care
- Children's Hospital of Orange County
- UCI Health Hematopoietic Stem Cell Transplant and Cellular Therapy Program

2023 National Impact

- Since 1987, NMDP has facilitated more than **125,000 transplants**. In 2023, NMDP **impacted 7,435 lives** through cell therapy.
- Today, patients have access to more than **41 million** potential donors worldwide.
- In 2023, NMDP provided **\$5.5 million** in patient assistance grants to more than **2,600 families**.

World-Class Partner

With the help of blood cell and marrow donors from the world's most diverse registry and our extensive network of transplant partners, physicians and caregivers, we're expanding access to treatment so every patient can receive their life-saving cell therapy. We strive to deliver the best experiences and services as the essential partner in cell therapy and remove the barriers to equitable access at all our locations.

4 Domestic Donor Centers

59 Domestic Collection Centers

73 Domestic Apheresis Centers

156 Domestic Transplant Centers

48 International Cooperative Registries

NMDP is a global leader in cell therapy.

- **Entrusted by Congress for 35+ years:** Since the inception of the C.W. Bill Young Cell Transplantation Program (the national registry), Congress has authorized NMDP to oversee the program.
- **NMDP finds cures and saves lives.** NMDP manages the most diverse listing of potential donors in the world (the national registry).
- **We treat and cure over 75 diseases** through cell therapy.
- **Accelerating Progress:** Underscoring NMDP's commitment to expanding access to cell therapy, we recently published findings showing that using expanded matching criteria could result in a nearly three-fold increase in the likelihood of securing a suitable donor. This breakthrough dramatically increases the chances of finding a match on the national registry, offering cell transplantation as a viable, life-saving therapy, regardless of ancestry.

Scott
Caregiver and courier, California

Gratitude is a part of everyday life for Scott. When his daughter Taryn was seven years old, she was diagnosed with severe aplastic anemia, a condition that occurs when the body can no longer produce enough new blood cells.

Unfortunately, no one among Taryn's relatives was a match for transplant, so the family turned to NMDP to help find a potential donor. "The prognosis for her well-being and having a healthy future was very grim," Scott recalled.

Fortunately, a donor was found, giving Taryn a second chance at life. Today, Taryn is a teenager and doing well. Scott's daily routine of gratitude is grounded by the generosity of a stranger.

"Without NMDP, we would not have found my daughter's donor," Scott said.

While the family initially got involved with NMDP when Taryn was diagnosed, Scott said he quickly knew that he would have a life-long connection with the organization. "I've assisted at several hundred registration events where 5,000 or more people have joined the registry," he said.

Along with donor drives, Scott is also a volunteer courier who helps deliver donated bone marrow and blood cells to patients in need.

"My favorite part about being an advocate is realizing how invaluable NMDP is in terms of providing hope for families who are going through the biggest challenge of their lives."
