

At Work in New Hampshire

NMDP is a leader in cell therapy, helping to find cures and save lives for patients with blood cancers, disorders and beyond. We're expanding access so that every patient can receive their life-saving cell therapy. Here's what our work looks like in your state:

2023 State Impact

360 searching patients

from 2019-23

199 transplants

from 2019-23

69 donors

answered the call from 2019-23

48,241 residents

willing to donate

Your support helps push the boundaries of what's possible.

From the moment a patient is diagnosed, we're there every step of the way. We create more opportunities for better outcomes. One way we do this is by providing patient assistance grants to help families cover out-of-pocket expenses related to transplant.

Since these grants became available, **34 patients in New Hampshire** have received financial assistance totaling **\$92,205 to help more patients** go through the transplant process.

NMDP Network Partners in New Hampshire

TRANSPLANT CENTER

- Dartmouth Hitchcock Medical Center

APHERESIS CENTER

- Dartmouth Hitchcock Medical Center

2023 National Impact

- Since 1987, NMDP has facilitated more than **125,000 transplants**. In 2023, NMDP **impacted 7,435 lives** through cell therapy.
- Today, patients have access to more than **41 million** potential donors worldwide.
- In 2023, NMDP provided **\$5.5 million** in patient assistance grants to more than **2,600 families**.

World-Class Partner

With the help of blood cell and marrow donors from the world's most diverse registry and our extensive network of transplant partners, physicians and caregivers, we're expanding access to treatment so every patient can receive their life-saving cell therapy. We strive to deliver the best experiences and services as the essential partner in cell therapy and remove the barriers to equitable access at all our locations.

4 Domestic Donor Centers

59 Domestic Collection Centers

73 Domestic Apheresis Centers

156 Domestic Transplant Centers

48 International Cooperative Registries

NMDP is a global leader in cell therapy.

- **Entrusted by Congress for 35+ years:** Since the inception of the C.W. Bill Young Cell Transplantation Program (the national registry), Congress has authorized NMDP to oversee the program.
- **NMDP finds cures and saves lives.** NMDP manages the most diverse listing of potential donors in the world (the national registry).
- **We treat and cure over 75 diseases** through cell therapy.
- **Accelerating Progress:** Underscoring NMDP's commitment to expanding access to cell therapy, we recently published findings showing that using expanded matching criteria could result in a nearly three-fold increase in the likelihood of securing a suitable donor. This breakthrough dramatically increases the chances of finding a match on the national registry, offering cell transplantation as a viable, life-saving therapy, regardless of ancestry.

Yuan
Patient, New Hampshire

For several years, Yuan was treated for polycythemia vera, which is a chronic blood disorder characterized by an overproduction of red blood cells that can lead to blood clots, stroke and heart attack.

Then in February 2022, Yuan was diagnosed with myelofibrosis, a rare blood cancer that causes scar tissue to build up inside a person's bone marrow and can lead to severe health complications. "It was devastating news for me and my family," Yuan said. "I knew it was going to happen but didn't expect it so soon."

Yuan described how the diagnosis had a tremendous impact on his life.

"I was a professor of Art and Design at Keene State College," he said. "I had to take early retirement to focus on my treatment. My career stopped because of this disease."

For now, Yuan and his family wait and hope for a matching donor to be found on the national registry.

"You can save a life and a family. It would mean the world to me and my family. My disease could be cured by a blood cell transplant."
